

## *Packing Robots*

Kleenline specializes in food and pharmaceutical packing operations. Regardless of the shape of the product we have the experience to gain control of your product and orient it so that it can be efficiently packed into cases or boxes.

Product orientation - using mechanical methods, servo controls, static devices, and pneumatics we can manipulate product and arrange it so that it can be picked up more efficiently for packing.

Vision Systems - using the latest technology we utilize vision technology to locate product, pick it and then deposit the product in the desired location with proper orientation.

Robot Simulation - Using proprietary FANUC Pick Pro software we can provide complete simulations to show proof of concept

Food Grade and Clean Room Robots- FANUC is a market leader in Food grade robots and the Kleenline robot experts can show you the correct robot for your application.

We have the expertise to fully automate your process through controls and robotics increasing efficiency and throughput while requiring less manpower.
