

Case Lift

Transfer Product Between Levels

Standard Specifications

Speeds: up to 60 cases per minute

Capacity: up to 100 pounds per case

Elevation: up to 15 feet

Designed to suit case size

Construction: Stainless Steel

Features and Benefits

- Vertical shaft design minimizes required space when conveying cases between floors
- Integral feed conveyor transports product through the unit for pass-through option or positions the case for lifting to the upper level
- Pneumatic pusher to discharge product at upper level of the lift
- Dynamic braking for controlled stops and starts and extended motor life
- Integral automation to control product movement. Settings can be programmed to handle delicate products
- Lexan covers to safely observe lift operation
- Custom designs available to meet your requirements
